Secretary's Report

The December Meeting of the Wellesley Amateur Radio Society was held in the Radio Room at the Wellesley Hills Branch Library on Monday, December 7th. The President asked for suggestions for future meetings. He suggested an ARRL Quiz to brush up on our radio theory. The following items were suggested by the group. Slides or ARRL movies on Audio Visual Aids, Frequency Measurement, SWR, and Getting DX. One member suggested having Leo Wilbur W1 MML give a talk on "getting DX". Several members mentioned the amateur radio course currently going on in the High School, and the Secretary promised to contact them about future club meetings.

The meeting then featured an ARRL Movie of the effect of the ionosphere on radio waves which was most interesting, ~~with~~ A short discussion period followed.

Refreshments were then served.

Respectfully submitted

Walter E. Lenk
Secretary.
